Initials \_\_\_\_\_

Attach an aerial photo, site map or engineer's design for your project. Include structures, impervious surfaces, proposed drainage systems, water storage and treatment systems, erosion control plans and other relevant information.

An application fee of \$10 and a field inspection fee of \$40 must be paid for each storm water permit. A \$10 application fee and a \$15 inspection fee must be paid for each erosion control plan permit. Design and/or erosion control plan information must be submitted with the application. The inspection fee may be refunded when an as-built drawing of the project has been submitted to the District office. After-the-fact permits will be subject to the application fee and all other costs incurred by the Okabena-Ocheda Watershed District. If, in the opinion of the Board of Managers, it is necessary for the watershed district engineer or other consultant to review the application and all exhibits, view the site, and make a report to the watershed district as to the technical implications of the work, costs incurred by the watershed district during this review shall be borne by the applicant. Unless otherwise specified in the permit, works for which the permit are issued shall be completed within two years or an extension must be requested.

I hereby make application for a permit to proceed with the proposal described above and have attached all supporting maps, plans, and other information submitted with this application and all necessary fees. The information submitted and statements made concerning this application are true and correct to the best of my knowledge.
